April Chapter Program

When
Tuesday, April 16, 2019 from 11:00 AM to 12:30 PM PDT
Add to Calendar

Lunch will be provided.

Where
AudioVisions
75430 Gerald Ford Drive
Suite 201
Palm Desert, CA 92211

Driving Directions

PROPER PLANNING FOR RESIDENTIAL ELECTRONIC SYSTEMS

As with other rough-in trades (mechanical, electrical, and plumbing), electronic systems should be planned for well in advance of construction and documented at the construction drawing phase of design. This course describes the processes used by professionals in the project planning, design, and installation phases of electronic systems. Participants will be able to identify different types of residential systems and the unique impact of each on specific design considerations, such as space, framing, electrical, and ventilation requirements. This course will also help attendees identify and analyze the benefits of working with trained electronic systems professionals.
